

Bruce Bower is currently President of Sonrise Technology Solutions, which specializes in business computer support.

He started programming computers in high school in 1970. After graduating from college, Bruce was an electrical engineer for 14 years. Bruce's first job in computers was as a contractor, moving computer systems at the Intel Rio Rancho manufacturing plant in 1993. From Intel he moved to Sandia National Labs in Albuquerque, New Mexico as a computer support technician. As a server manager at Sandia, he took care of 50 servers from Washington DC to Tonopah Test Range in Nevada. While at Sandia, Bruce started his company, Sonrise Technology Solutions, Inc.

Sonrise brings Bruce's experience in the enterprise and applies it to small business. Sonrise supports many different types of business from doctors' offices, to construction companies. No matter what the company does, Sonrise strives to make it more efficient, run smoothly and safely, using the technology appropriate for that business. Sonrise has created secure networks for many companies suited to their specific requirements.

Bruce has been an Albuquerque resident since 1977, and lives with his wife and 2 sons.
